

Endeavour Speciality Chemicals has been awarded ISO 9001:2015 Certification

(February 2018)

We are pleased to announce that Endeavour Speciality Chemicals has successfully achieved ISO 9001:2015 certification. The company has made the successful transition from ISO 9001:2008, with collaborative efforts from all disciplines. ISO 9001 is an internationally recognised standard and focuses on quality management principles, influencing and guiding processes right across the company.

Endeavour Speciality Chemicals has a programme of continuous improvement which is driven by the organisation's Quality Policy, Quality Objectives and HACCP plans.

Endeavour Speciality Chemicals has been ISO registered since 1997 and is committed to providing products and services of the highest standards to their customers. The Quality Management System is designed to consistently ensure the reproducibility of these products and services.

About Us

Founded in 1991, Endeavour Speciality Chemicals is a specialist manufacturer of high-impact aroma chemicals and chemical intermediates. The company's core expertise in sulfur and heterocyclic chemistries has led to a prime product portfolio. Endeavour Speciality Chemicals products have applications in a range of industry sectors, including: flavours and fragrances, pharmaceutical research and material sciences. Their manufacturing site in Daventry UK has the capacity to manufacture organic chemicals at gram scale for sample validation to tens of kilograms.
